Date: 23rd February 2016

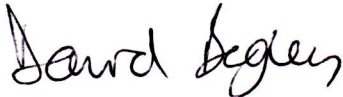

Automated external defibrillator (AEDs) are installed in the community and housed in special cabinets. Known as community public access defibrillators (CPAD), these can be accessed in an emergency by any member of the public. Simple and vital, and designed to make life saving defibrillation possible for everybody, accessible everywhere.

We, the undersigned, support the initiative to install Automated External Defibrillators in local communities, such as Hilton.
