

Neighbourhood Speedwatch needs you!

It's a 30 mph limit for a reason!

- If a driver hits a pedestrian at 30mph, there is an 80% chance the pedestrian will survive.
- At 40mph there is a 80% chance of the driver killing a pedestrian.

If you are concerned about speeding through the village and would like to help, please contact the Parish Clerk or Hilton Action on Traffic.

A team of trained volunteer observers, drawn from the different communities in the St Ives area, is deployed just a few hours each month with roadside speed detector units at speeding hot spots.

A typical Speedwatch session lasts for only one hour and although previous checks have been during rush hour, timing can be reasonably flexible to fit in with observers' availability.

St Ives Police will arrange the necessary training.
